## \*Notice to Investors: Non-GAAP Financial Measures

Gross profit, Core G&A and EBITDA are non-GAAP financial measures. Management believes that presenting certain non-GAAP financial measures by excluding or including certain items can be helpful to investors and analysts who may wish to use some or all of this information to analyze the Company's current performance, prospects and valuation. Management uses this non-GAAP information internally to evaluate operating performance and in formulating the budget for future periods. Management believes that the non-GAAP financial measures and metrics discussed herein are appropriate for evaluating the performance of the Company.

EPS Prior to Amortization of Intangible Assets and Acquisition Costs is defined as GAAP EPS plus the per share impact of amortization of intangible assets and acquisition costs. The per share impact is calculated as amortization of intangible assets expense and acquisition costs, net of applicable tax benefit, divided by the number of shares outstanding for the applicable period. The Company presents EPS Prior to Amortization of Intangible Assets and Acquisition Costs because management believes that the metric can provide investors with useful insight into the Company's core operating performance by excluding non-cash items and acquisition costs that management does not believe impact the Company's ongoing operations. EPS Prior to Amortization of Intangible Assets and Acquisition Costs is not a measure of the Company's financial performance under GAAP and should not be considered as an alternative to GAAP EPS or any other performance measure derived in accordance with GAAP. For a reconciliation of EPS Prior to Amortization of Intangible Assets and Acquisition Costs, please see the prior page.

Gross Profit is calculated as total revenues, which were \$1,898 million for the three months ended June 30, 2021, less advisory and commission expenses and brokerage, clearing and exchange fees, which were \$1,273 million and \$23 million, respectively for the three months ended June 30, 2021. All other expense categories, including depreciation and amortization of fixed assets and amortization of intangible assets, are considered general and administrative in nature. Because the Company's Gross Profit amounts do not include any depreciation and amortization expense, the Company considers Gross Profit to be a non-GAAP financial measure that may not be comparable to similar measures used by others in its industry. Management believes that Gross Profit can provide investors with useful insight into the Company's core operating performance before indirect costs that are general and administrative in nature. For a calculation of Gross Profit, please see the prior page.

Core G&A consists of total operating expenses, which were \$1,711 million for the three months ended June 30, 2021, excluding the following expenses: advisory and commission, regulatory charges, promotional, employee share-based compensation, depreciation and amortization, amortization of intangible assets, brokerage, clearing and exchange and acquisition costs. Management presents Core G&A because it believes Core G&A reflects the corporate operating expenses categories over which management can generally exercise a measure of control, compared with expense items over which management either cannot exercise control, such as advisory and commission expenses, or which management views as promotional expense necessary to support advisor growth and retention, including conferences and transition assistance. Core G&A is not a measure of the Company's total operating expenses as calculated in accordance with GAAP. For a reconciliation of Core G&A to the Company's total operating expenses, please see below.

EBITDA is defined as net income plus interest and other expense, income tax expense, depreciation and amortization, amortization of intangible assets and loss on extinguishment of debt. The Company presents EBITDA because management believes that it can be a useful financial metric in understanding the Company's earnings from operations. EBITDA is not a measure of the Company's financial performance under GAAP and should not be considered as an alternative to net income or any other performance measure derived in accordance with GAAP. In addition, the Company's EBITDA can differ significantly from EBITDA calculated by other companies, depending on long-term strategic decisions regarding capital structure, the tax jurisdictions in which companies operate and capital investments. For a reconciliation of EBITDA to net income, please see the prior page.
